PROFILE

Cloud engineering graduate with hands-on AWS experience and an unconventional background in medical laboratory science and UI/UX design. I bring strong research skills, structured problem-solving, and the discipline to learn through documentation, experimentation, and iteration.

My healthcare background taught me that details matter and shortcuts aren't acceptable. My design work taught me to think about users first. I'm looking for a junior cloud or DevOps role where I can contribute meaningfully while growing under experienced mentorship.

TECHNICAL SKILLS

CLOUD & DEVOPS

`AWS EC2` `EKS` `VPC` `S3` `Lambda`
`IAM` `CloudWatch` `Docker`
`Kubernetes` `Terraform` `Linux`
`GitHub Actions` `Bash`

TOOLS & LANGUAGES

`Git` `Python` `YAML` `Figma`

WHAT I BRING

Systematic troubleshooting & QA mindset from healthcare · User-centered thinking from design · Self-directed research & documentation discipline

PROJECTS

Cloud Infrastructure Deployment   Feb 2026

AltSchool Africa · Capstone Project

→ Deployed Kubernetes infrastructure on AWS for a multi-tier demo application

→ Automated infrastructure provisioning using Terraform — VPC, EKS, S3, Lambda

→ Implemented CI/CD pipeline with GitHub Actions for automated deployment and testing

→ Managed EC2 instances and configured Linux environments for deployment

→ Configured monitoring with CloudWatch and established security best practices; documented every step

`AWS EKS` `Terraform` `Kubernetes` `Docker` `GitHub Actions`

Containerized Backend Application   `Jan 2026`

`AltSchool Africa`

→ Containerized a Go REST API with MongoDB using Docker and Kubernetes

→ Implemented multi-stage Docker builds and automated deployment scripts

→ Configured high availability with 2 replicas and persistent storage

`Docker` `Kubernetes` `Go` `MongoDB`

EXPERIENCE

Freelance UI/UX Designer   `Aug 2024 - Present`

→ Design healthcare and SaaS platforms using Figma

→ Collaborate directly with developers to implement designs

→ Conduct user research and usability testing to inform iterations

Medical Laboratory Scientist Intern   `May 2024 - May 2025`

`National Orthopaedic Hospital Igbobi, Lagos`

→ Maintained quality control procedures across laboratory workflows with strict accuracy standards

→ Documented processes and tracked samples using information systems

→ Collaborated with medical teams in a time-sensitive, high-stakes environment

★ Named Best Seminar Representative among all interns

EDUCATION

Cloud Engineering Diploma

AltSchool Africa

`2025 - 2026`

B.Sc. Medical Laboratory Sciences

University of Lagos

`2016 - 2024`

`Available for junior cloud / DevOps roles · Open to remote and Lagos-based opportunities`
